INTRODUCTION

The South African context

- Background to South Africa
- Social-political situation
- Crime situation

Background

Wednesday, 17 July, 13

Wednesday, 17 July, 13

Wednesday, 17 July, 13

Canada
Population
35 million
8 x size of SA

South Africa
Population
50 million

The socio-political situation

Political legacy

whites

History of forced segregation

Wednesday, 17 July, 13

History of forced segregation

Extreme levels of poverty

Wednesday, 17 July, 13

Inequality and income disparity

Unemployment: 40 – 50%

Lack of respect for law and order; moral decay

Wednesday, 17 July, 13

The crime situation

Wednesday, 17 July, 13

The crime situation

- Crime levels very high relative to many other countries
- More than 15 600 murders per year - 31 per 100 000
- Since 1994 the murder rate has decreased by almost 54%, (from 70 per 100 000)
- USA – 4.2 per 100 000 (13 000)
- Highest murder rate 2012 - Honduras (92 per 100 000)

Extreme violence

Wednesday, 17 July, 13

High levels of fear

Wednesday, 17 July, 13

Fear... sometimes it is justified

Wednesday, 17 July, 13

The physical environment can contribute to, or reduce, the fear of crime

Wednesday, 17 July, 13

Wednesday, 17 July, 13

Wednesday, 17 July, 13

Wednesday, 17 July, 13

Implications

- High levels of crime, violence and fear, combined with...
- Inequalities – extreme differences in context
- Affect the nature of strategies and initiatives aimed at reducing crime

RESPONSES TO CRIME

Responses are context specific

- Affluent communities – often rely on private resources and funding
- Poorer communities – do not have access to resources other than those provided by the government

Typical responses to crime and the fear of crime – affluent areas

Wednesday, 17 July, 13

Typical responses to crime and the fear of crime – affluent areas

Wednesday, 17 July, 13

Walls are built around private houses...

Wednesday, 17 July, 13

In South Africa, walls are contentious

- Emotive responses - for and against
- Need for security vs exclusion
- One of the more visible manifestations of people's fear of crime, esp. in affluent areas
- To many people, including the poor, solid walls have come to represent the "must-have" protection system, a barrier without which they feel vulnerable and exposed to crime

PROJECT – REMOVING A SECURITY WALL

Wednesday, 17 July, 13

Removing the perimeter wall at the Goethe-Institut, Johannesburg

Wednesday, 17 July, 13

Project description

- A German cultural organization based in an affluent part of Johannesburg (Parktown)
- Required guidance to replace the perimeter wall with alternative security measures without compromising the safety of employees and members of the public
- Employees / users of the facility needed to be “involved” in the decision to remove the wall
- Removing a wall goes against natural instinct

Project objectives

- To make the Institute more accessible to visitors and strengthen its image as a welcoming, inclusive cultural organization
- To demonstrate the Institute's commitment to the breaking down of cultural barriers and the creation of integrated communities
- To symbolically commemorate the falling of the Berlin wall 20 years ago (1989), as well as 15 years of democracy in South Africa (1994)

Project activities

- Information sharing and public discussions regarding safety & security and walls to inform, share concerns and address fears
- Rudimentary risk assessment, CPTED analysis
- Involve architecture students in generating ideas and proposing alternatives to the wall
- Develop and execute the intervention

Wednesday, 17 July, 13

Design and technology interventions

- Employ a multi-pronged approach
 - Passive mechanisms (CPTED)
 - Electronic mechanisms (motion detection alarm system, CCTV, locks)
 - Burglar proofing at windows, security gates at doors
 - Security guard
- Techniques / strategies / tools
 - Defined private and public zones
 - Surface treatment (paving, grass)
 - Landscaping (plants)
 - Lighting

Wednesday, 17 July, 13

Wednesday, 17 July, 13

Wednesday, 17 July, 13

CONCLUSION

CPTED without boundaries

- Exclusionary CPTED
 - Building barriers
 - Architecture of fear

CPTED without boundaries

- Exclusionary CPTED
 - Building barriers
 - Architecture of fear
- Inclusionary CPTED
 - Building bridges
 - Integrating communities

Use more agreeable, less divisive ways of defining territory

Wednesday, 17 July, 13

Apply CPTED principles to build communities rather than barriers
