

Mid-year update

2017 is turning out to be an exciting year for the ICA. With several forums, conferences and training events being held around the globe there is little doubt the value of CPTED strategies is recognized to enhance our communities and address those complex issues every community has.

In June of this year several ICA Directors were honored to join our CPTED Honduras colleagues in Tela, Honduras for an amazing two days of information sharing and networking. With more than 200 people in attendance from Central America, USA, Canada, South America, UK, France and other European neighbors the information delivered was truly international and inspiring. Our Directors and colleagues that presented did all of us proud!

Gatherings like these magnify the value of membership with the ICA by connecting you to professionals, influencers and community leaders that have addressed many issues similar to what you are working on today. Beyond the great information, the CPTED family continues to grow and support each other. We hope to continue this very international flavor in Calgary with your presence!

Barry Davidson
Executive Director
